To

The Director,
IHRD
Trivanthapuram.

Sir,

Sub: Government funded free remedial tuitions for SC/ST students -reg.

Model Finishing School (a unit of IHRD, Government of Kerala) in association with the SC and ST Development Department is providing free remedial tuitions for B.Tech students with a desire to enhance the pass out percentage of the SC/ST student commune. Regular students as well as students who have completed the course with backlogs can register and avail the benefits of the programme. The SC/ST department has suggested imparting the remedial classes at Model Finishing School, Thiruvananthapuram by providing free hostel facility and food for ensuring cent percent pass in the exams.

We have a full-fledged team of qualified faculty who are available on all days of the week, handling the classes efficiently and effectively. We currently cover subjects (papers) from all the universities in Kerala and all the major branches like Civil Engineering, Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering, Electronics & Instrumentation Engineering, Mechanical Engineering and Biotechnology.

Features of the remedial tuition programme:

- 50 hours remedial tuition per subject
- Evaluation tests and assessments
- Pre/post examination counseling
- Question paper discussions
- Notes/ handouts are provided
- Individual attention guaranteed

The first batch of remedial tuitions has been completed and about 50 students have benefited from the programme. Among the completed tuitions, the published results are very much promising. The students are currently attending their exams now, with confidence. The next batch of tuitions will commence soon, in the month of July 2019.

I request you to forward the communication to all IHRD affiliated engineering institutions in Kerala for the benefit of the students.

In all Sincerity
